Competent Persons Statement

Competent Person's Statement: The Mineral Resource statement has been prepared by Mr Brad Cox.

Mr Cox confirms that he is the Competent Person for all the Mineral Resource estimates summarised in this Report and he has read and understood the requirements of the 2012 Edition of the Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves (JORC Code, 2012 Edition). Mr Cox is a Competent Person as defined by the JORC Code, 2012 Edition, having relevant experience to the style of mineralisation and type of deposit described in the Report and to the activity for which he is accepting responsibility. Mr Cox is a Member of the Australasian Institute of Mining and Metallurgy (MAusIMM No. 220544). Mr Cox has reviewed the Report to which this Consent Statement applies. Mr Cox is a full time employee of Aeris Resources Limited.

Mr Ian Sheppard, confirms that he is the Competent Person for all the Ore Reserve estimates summarised in this Report and Mr Sheppard has read and understood the requirements of the 2012 Edition of the Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves (JORC Code, 2012 Edition). Mr Sheppard is a Competent Person as defined by the JORC Code, 2012 Edition, having five years' experience that is relevant to the style of mineralisation and type of deposit described in the Report and to the activity for which he is accepting responsibility. Mr Sheppard is a Member of The Australasian Institute of Mining and Metallurgy, No. 105998. Mr Sheppard has reviewed the Report to which this Consent Statement applies. Mr Sheppard is a full time employee of Aeris Resources Limited.

Mr Sheppard has disclosed to the reporting company the full nature of the relationship between myself and the company, including any issue that could be perceived by investors as a conflict of interest. Mr Sheppard has disclosed to the reporting company the full nature of the relationship between himself and the company, including any issue that could be perceived by investors as a conflict of interest. Specifically Mr Sheppard has rights to 22,418,546 share options that will vest over the next five years and may be converted to shares over time when various conditions are met.

All dollar figures are in Australian dollars unless otherwise indicated.

Rebirth of a Mid-Tier Copper Producer

- Aeris Resources Limited (ASX: AIS) is a copper producer in New South Wales
- In FY 2018 Aeris forecast production of 27,000 tonnes of copper
- Since early 2013, the current Aeris management team has been engaged in a comprehensive operational and financial restructuring of the Company

AERIS IN EARLY 2013

- ~US\$150M in senior debt to Standard Chartered Bank and Credit Suisse
- Non-performing mines in Australia and Indonesia
- Multiple non-core assets
- Head office of over 30 people
- Market capitalization went from +\$300M to \$5M
- New management team appointed

AERIS TODAY

- Production volumes of 23-30kt per year
- Non-core assets divested. Closed Indonesian Gold Mine
- Head office of 7 people
- Senior Debt reduced to US\$50M in Dec 2015 - Standard Chartered (SCB)
- Positioned for growth

Company Snapshot

	Current	Fully diluted
Shares on issue	140.1m	934.1m*
Share price	6.9c (28 Aug 17)	6.9c**
Market Cap	\$9.7M	\$64.4M***

* Convertible preference shares with SCB (60%) and PAG (15%) and Management Options (10%) – all on a fully diluted basis

** Closing Price as of 28 August 2017

*** Notional fully diluted market capitalisation

	AISC:	<ul style="list-style-type: none"> FY17: A\$3.51/lb
	Mine Life:	<ul style="list-style-type: none"> 6 year Life of Mine Plan
	Logistics:	<ul style="list-style-type: none"> Transported from site by rail c. 700km to the deepwater Port Waratah, Newcastle

* As at 30 June 2016

** Includes 150t copper contained in copper cement

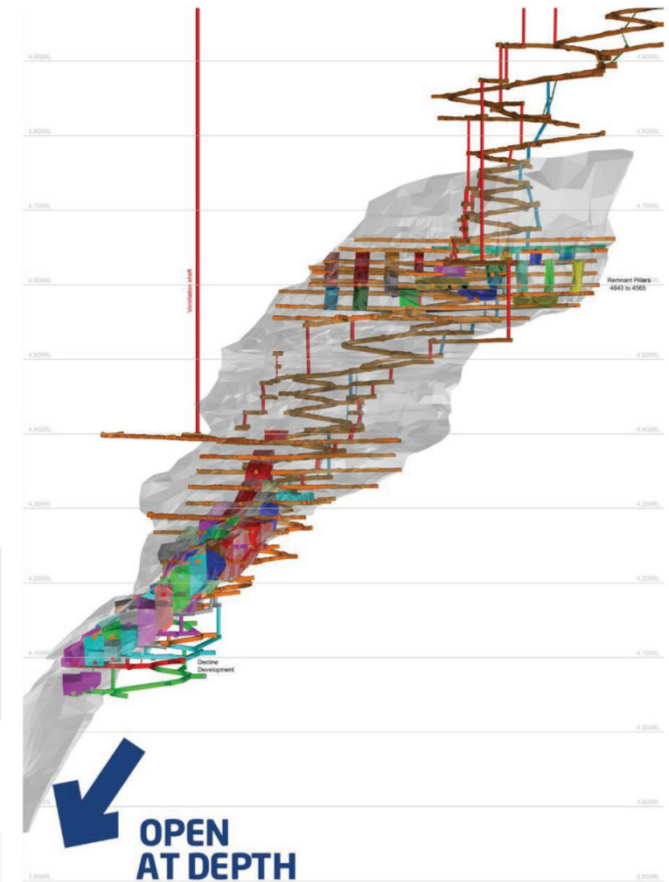

Tritton

- Baseload ore source - >1mtpa
- \$10M Ventilation Shaft being commissioned – allows production rates to be maintained above 1mtpa
- Mobile fleet renewal – ongoing
- **Orebody extends at depth** – brownfields exploration potential

TRITTON

* As at 30 June 2016

Murrawombie

- **Development commenced FY17** – early issues resolved by change to bottom-up mining
- **Production ramping up** – full production rates achieved during FY18
- **Potential Upside** – recently identified distinct higher grade zones which can be mined separately

* As at 30 June 2016

MURRAWOMBIE

Focus on execution and delivery...

1.8mtpa Processing Plant

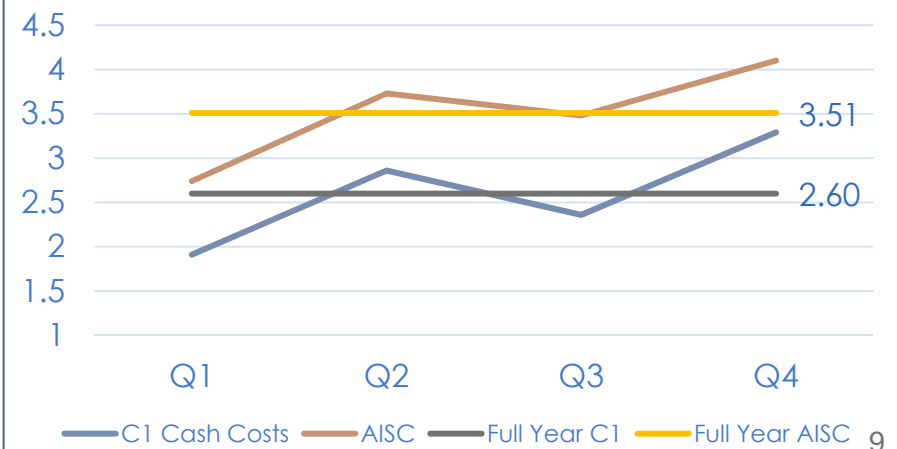

- **Float cell replacement** – delivering improved metallurgical performance
- **Further infrastructure upgrades** planned for FY18

Tritton Copper Production

FY17 Unit costs \$A/lb

Pipeline of Mining Projects

- Avoca Tank – high grade underground
- Murrawombie Pit – cut-back of existing pit to access near-surface sulphide ore
- Budgery – near surface sulphide & oxide ore accessible by open pit

Exploring & Growing

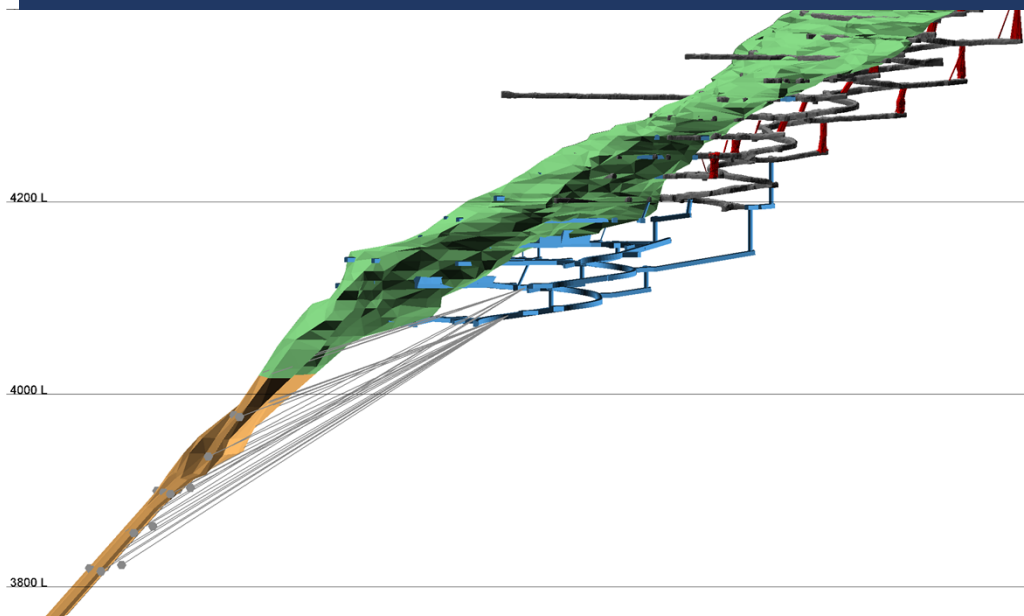

- Brownfields Exploration
- Greenfields Exploration
- Mergers & Acquisitions

Brownfields Exploration

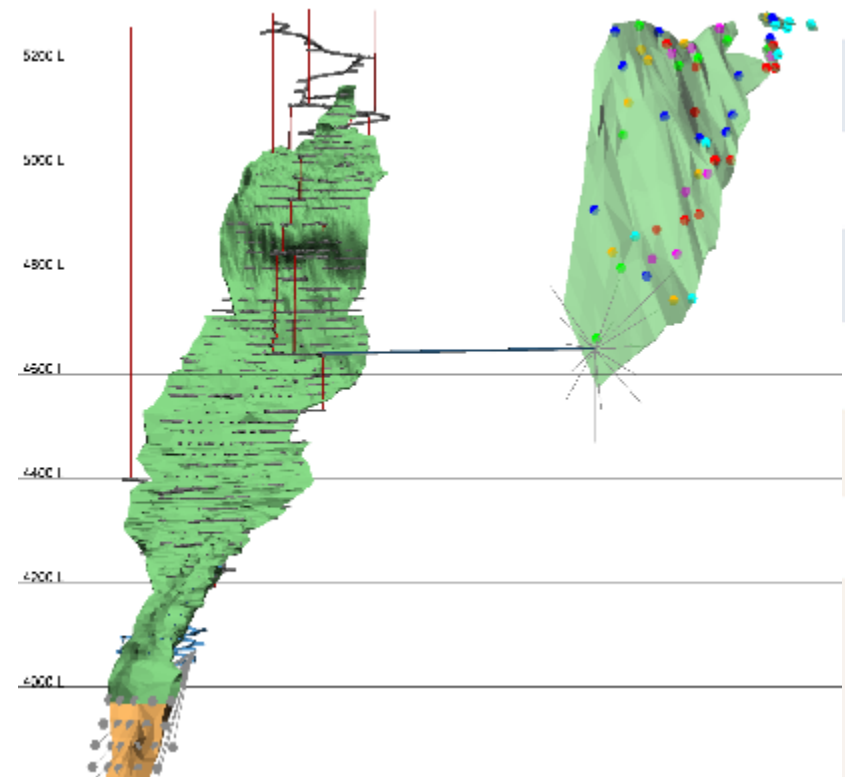

- Potential resource extensions Tritton and Murrawombie - open at depth
- Near mine opportunity with Budgerygar Deposit – could mine from Tritton

Tritton

Budgerygar

Greenfields Exploration – Tritton Tenement Package is a proven copper region

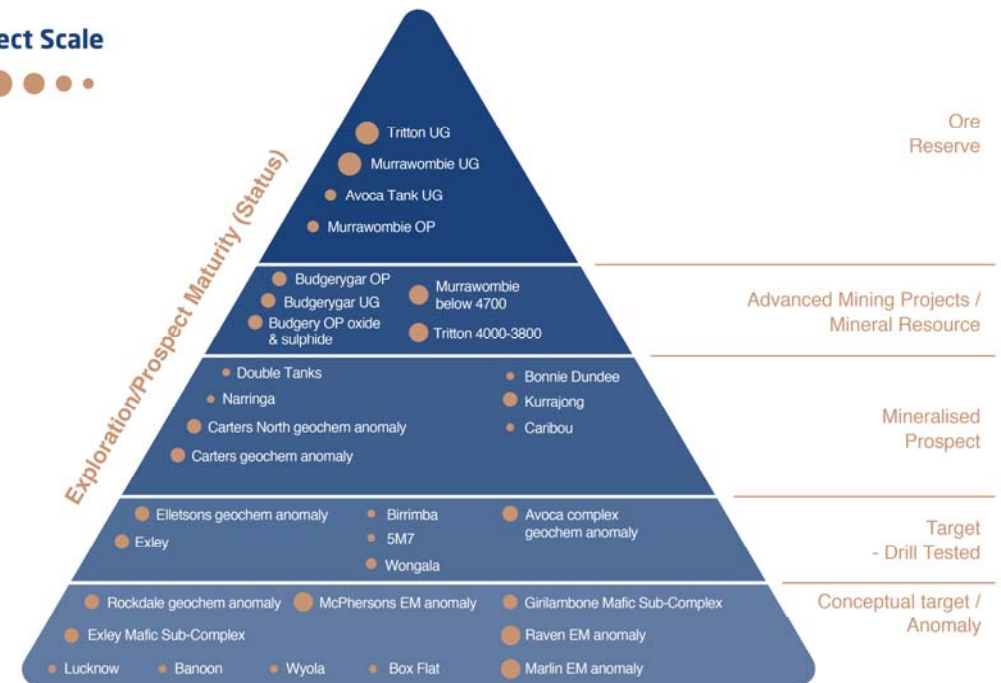

Aim to Progress Projects & Prospects to Higher Levels of Quality

“Besshi” style VMS orebodies generally occur in clusters

- Tritton region hosts “Besshi” style VMS deposits
- Tritton tenement package >1,800km²
- Mining to date has been from Girilambone and Tritton complexes – multiple deposits discovered in each
- Significant exploration potential
 - ✓ Multiple new mafic complexes already identified
 - ✓ Under-explored tenements
 - ✓ New technology able to “see” deeper

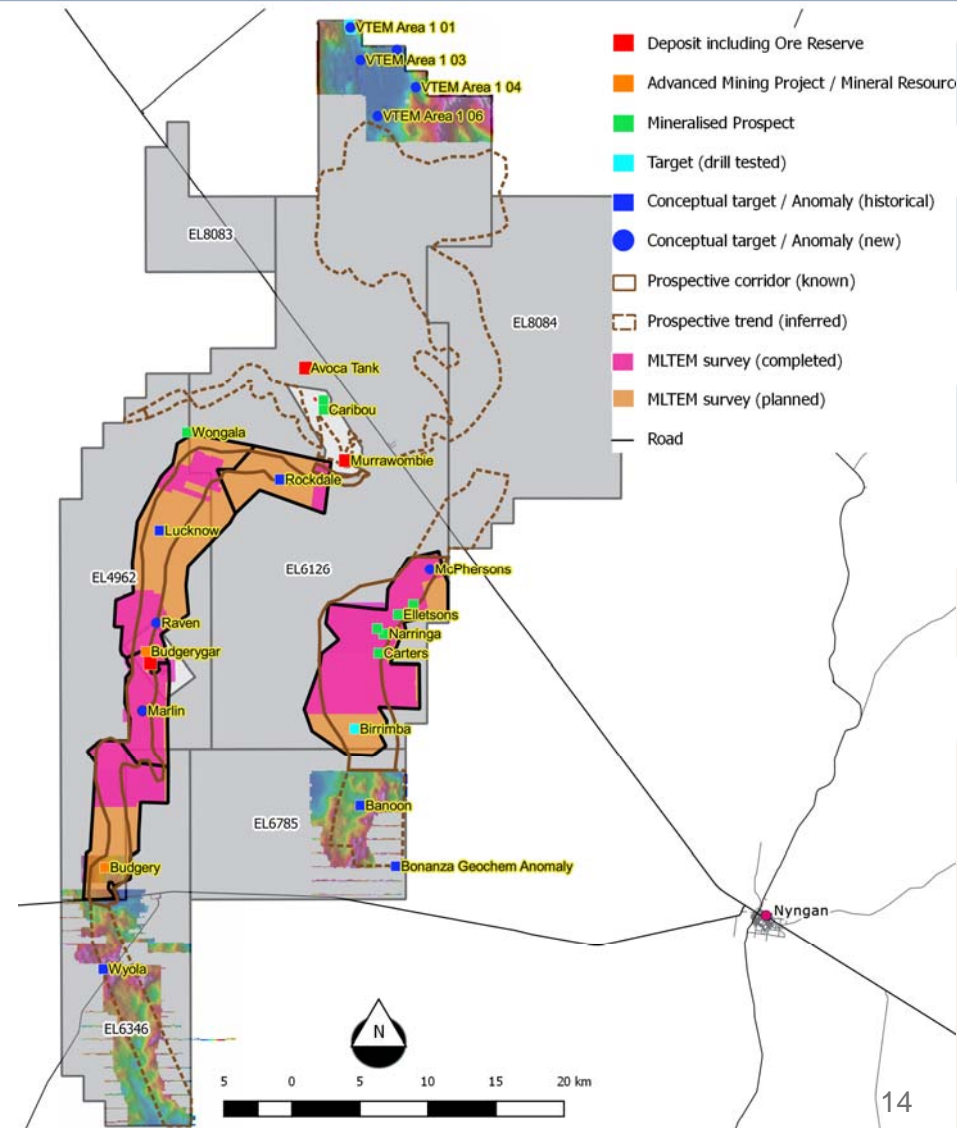

Project Scale

Ramping-up Greenfields Exploration – early success

- \$7.5M greenfields exploration program kicked off in December 2016
- High Power Electromagnetic (MLTEM) survey - new technology able to “see” deeper
 - Focused on the next +10Mt orebody (ie. Tritton sized orebodies)
 - 50% complete by end June 2017
 - Identified 3 new anomalies so far
 - Also “saw” known Kurrajong prospect down to 500m – proves technology
- Helicopter VTEM survey in March quarter on underexplored northern and southern extremities of tenement package
 - Multiple anomalies identified
- Next Steps
 - Complete MLTEM survey
 - Rank anomalies for further work

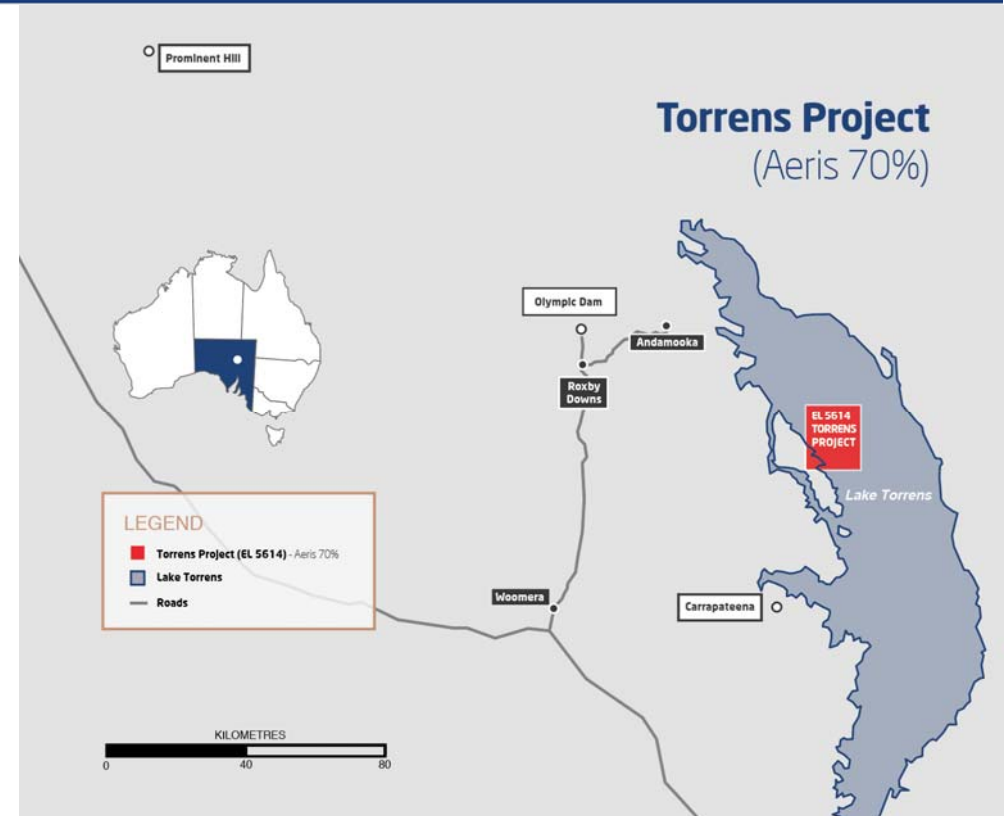

Regional Exploration Portfolio – Torrens Project

Torrens (South Australia)

- 70/30 JV with Argonaut Resources NL
- Large regionally significant coincident magnetic and gravity anomaly
- Bigger footprint than Olympic dam
- Getting closer to drill ready

Growth through M&A

- First – exploring options to improve Capital structure
- Seeking to acquire additional assets through M&A
- Focus on Base Metals (Copper and Zinc) and Gold
- Preferred jurisdiction is Australia but will consider offshore based on potential risk and return
- Asset type – producing or ready to develop assets

Summary

Investment Rationale: Poised for Growth

- Established and growing copper producer (27kt guidance for FY18)
- Foundation set with Tritton Copper Operations performance and 5+ year Life of Mine Plan
- Board and management team with a proven track record and clear vision and strategy
- Re-commenced exploration around Tritton – early results promising
- Torrens Project – significant potential – getting close to drill ready
- Strong leverage to copper price upside and exploration success
- Now in a position to focus on growth strategies

To become a mid-sized, multi-mine company, delivering shareholder value through an unwavering focus on operational excellence

Thank you.

CLEAR GROWTH OPPORTUNITIES • PROVEN TEAM • **SHARED VISION**
